PERSONAL PROJECTS

Yet Another Habit Tracker (02/2022 - 03/2022)

- Yet Another Habit Tracker is a web app along with an android application where you can keep a track of your habits. The code is kept closed source for now, but here are the links to the applications. The backend is also designed from scratch using express and node.js
- Web app - <https://www.yahabittracker.com/>
- Android app (Made with flutter): <https://play.google.com/store/apps/details?id=com.ayushmanbthakur.yaht>

Expense Tracker (07/2021 - 07/2021)

- A simple expense tracker with HTML CSS and Javascript
- https://github.com/AyushmanBilasThakur/expense_tracker
- <https://transaction-list.netlify.app/>

Odd n Even (04/2020 - 05/2020)

- Odd n Even is a game built on pure HTML CSS and JavaScript where the user needs to click buttons or press keyboard arrows(desktop) or swipe(mobile) to tell if a number is even or odd. Working Game: <https://oddneven.netlify.app/> source code: https://github.com/AyushmanBilasThakur/Odd_N_Even

QuotesApp (01/2019 - 04/2019)

- QuotesApp is an app where you can share your own creative and innovative quotes. Check out at <https://ayushmanbilasthakur.github.io/QuotesApp/home>

TapTimer (05/2020 - 05/2020)

- A stopwatch app made in Angular to keep record of what you are doing and how much of the intended tasks you have done. This app was made in collaboration with a senior and a junior of my college. I integrated the design with the main logic. <https://productivity-stopwatch.netlify.app/>
